An Easy Pill to Swallow?

Take Your Pharmacy Benefits Management To The Next Line

Introducing Transparent Pharmacy Pricing!

Transparent Pricing

In today's PBM world, there are many pricing methodologies, ranging from spread pricing to percentage off of AWP. With MCI RX, what we pay for the medication is what our clients pay, plus a disclosed administrative fee.

Win-Win

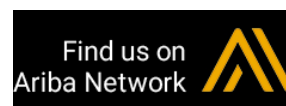

Being able to give injured workers a better, safer experience while saving money is a win-win situation. Our motto is clear: When our clients succeed, we succeed!

State-of-the-Art

MCI RX proprietary technology is at the forefront of our program and integrated into physician platforms. This real-time, point-of-care technology has provided the following benefits to our clients:

- Approved substitutes are suggested if medication is outside the formulary
- Up to 40% reduction in prior authorization requests to adjusters
- Increase in formulary drugs (over \$400 per script savings)
- Reduces or eliminates wait time for prior authorizations at the pharmacy
- Mitigate inappropriate drug use with the medication history access
